

Engineering Specification Sheet

Skirt Seal – At-Last-A-Seal

- A. The conveyor skirt seal shall be the patented Gordon "At-Last-A-Seal", no equal. The seal shall be installed along the lower edge of the chute wall on both sides (left and right) of the belt.
- B. All skirt seal shall be installed in accordance with the manufacturer's standards and recommendations.
- C. The skirt seal shall consist of an EPDM rubber extrusion that shall encapsulate the lower edge of the chute wall. The skirt seal shall be one continuous length (per side) that is specified by the customer. The skirt seal shall be held in place by a series of retaining chains located along the entire length of the skirt seal. There shall be no clamps or other mounting hardware required. The skirt seal shall conform to the belt, without need for adjustment after being properly installed.
